

## BENEFITS FROM PELLET BOND™

### Lowers Manufacturing Cost

*Lubricates die to lower amp load and increase throughput.*

### All Natural

Made from modified corn starch

### Low Inclusion Rate

Recommended 10 lbs per ton in most rations

### No Oder

Increased palatability

### Better Pellet Binding

Higher temperatures for better gelatinization

### Increased Feed Efficiency

Pelleting waste less high cost feeds

### Pellets Stay Together

Hard dense pellet stays intact to reduce waste and increase conversion rates

## PelletBond™ Natural Pellet Binder

Manufactured from modified starch. PelletBond™ provides a high quality all-natural binder and die lubricant for pellets, crumbles, cubes, range blocks and pet foods.

PelletBond™ is a natural replacement for unpalatable, smelly, hard to handle chemical binders.

Proven in feed plants and mills to increase profits by cutting amp loads on mills allowing increased output.

## PELLETBOND™

### Natural

Made from corn starch, in food grade plants. PelletBond has no added chemicals.

### Cost Savings

PelletBond™ acts as a die lubricant when activated by moisture and temperature to lower amps on mills 6-7% increasing throughput and lowering cost.

### High Quality

PelletBond is made in modern food grade plants that are inspected regularly.

### Durable Pellets

PelletBond™ saves high cost feed from being wasted, increases conversion.

### Palatable

No noxious odors or bitter taste.

### Safe

Biodegradable, food safe, traceable

### Low Inclusion Rate

PelletBond™ is a low inclusion binder typically added to the ration at 5-10 lbs per ton. These low levels reduce ration cost and allow more formulation flexibility.

## PELLETBOND™ THE NATURAL SOLUTION

MATAM Corp. is committed to providing high quality natural products and excellent service. We have combined expertise in nutrition and starch manufacturing for outstanding customer service.
